# Les Laboratoires Camylle

## Research and development... 30 years of history

Bernard MASSING, founded the company Madislor in 1976.

For many years, he had been developing, in his workshop next to the family house, innovative new products for the cosmetics and hygiene markets. In the 90's, a customer from Paris asked whether it was possible for him to create the scent of a sauna. This was the starting point for the adventure of the Camylle brand!

During two years the designer developed his product, thousands of tests were carried out dated and numbered, experience that, by the way, was collected to the chagrin of his wife, in the Family House. From the beginning he was striving for perfection.

After more than two years of research with the unique recipes using the ingredients of the Camylle laboratories the end products were ready for launch. The first two product ranges were based on essential oils and were carefully selected for sauna and steam baths.

The search for new methods for converting essential oils, aromatic therapy draughts and solutions for wellness centers has become a passion for Bernard MASSING. The most famous, most prestigious hotels and thalassotherapy palaces adopted his products in quick succession.

In 2005 his son Marc, who also has a deep passion for the precious essential oils, became the successor of the retiring company founder.

With the same determination, his aim is to offer the products as natural as possible. He makes no concessions on the quality of

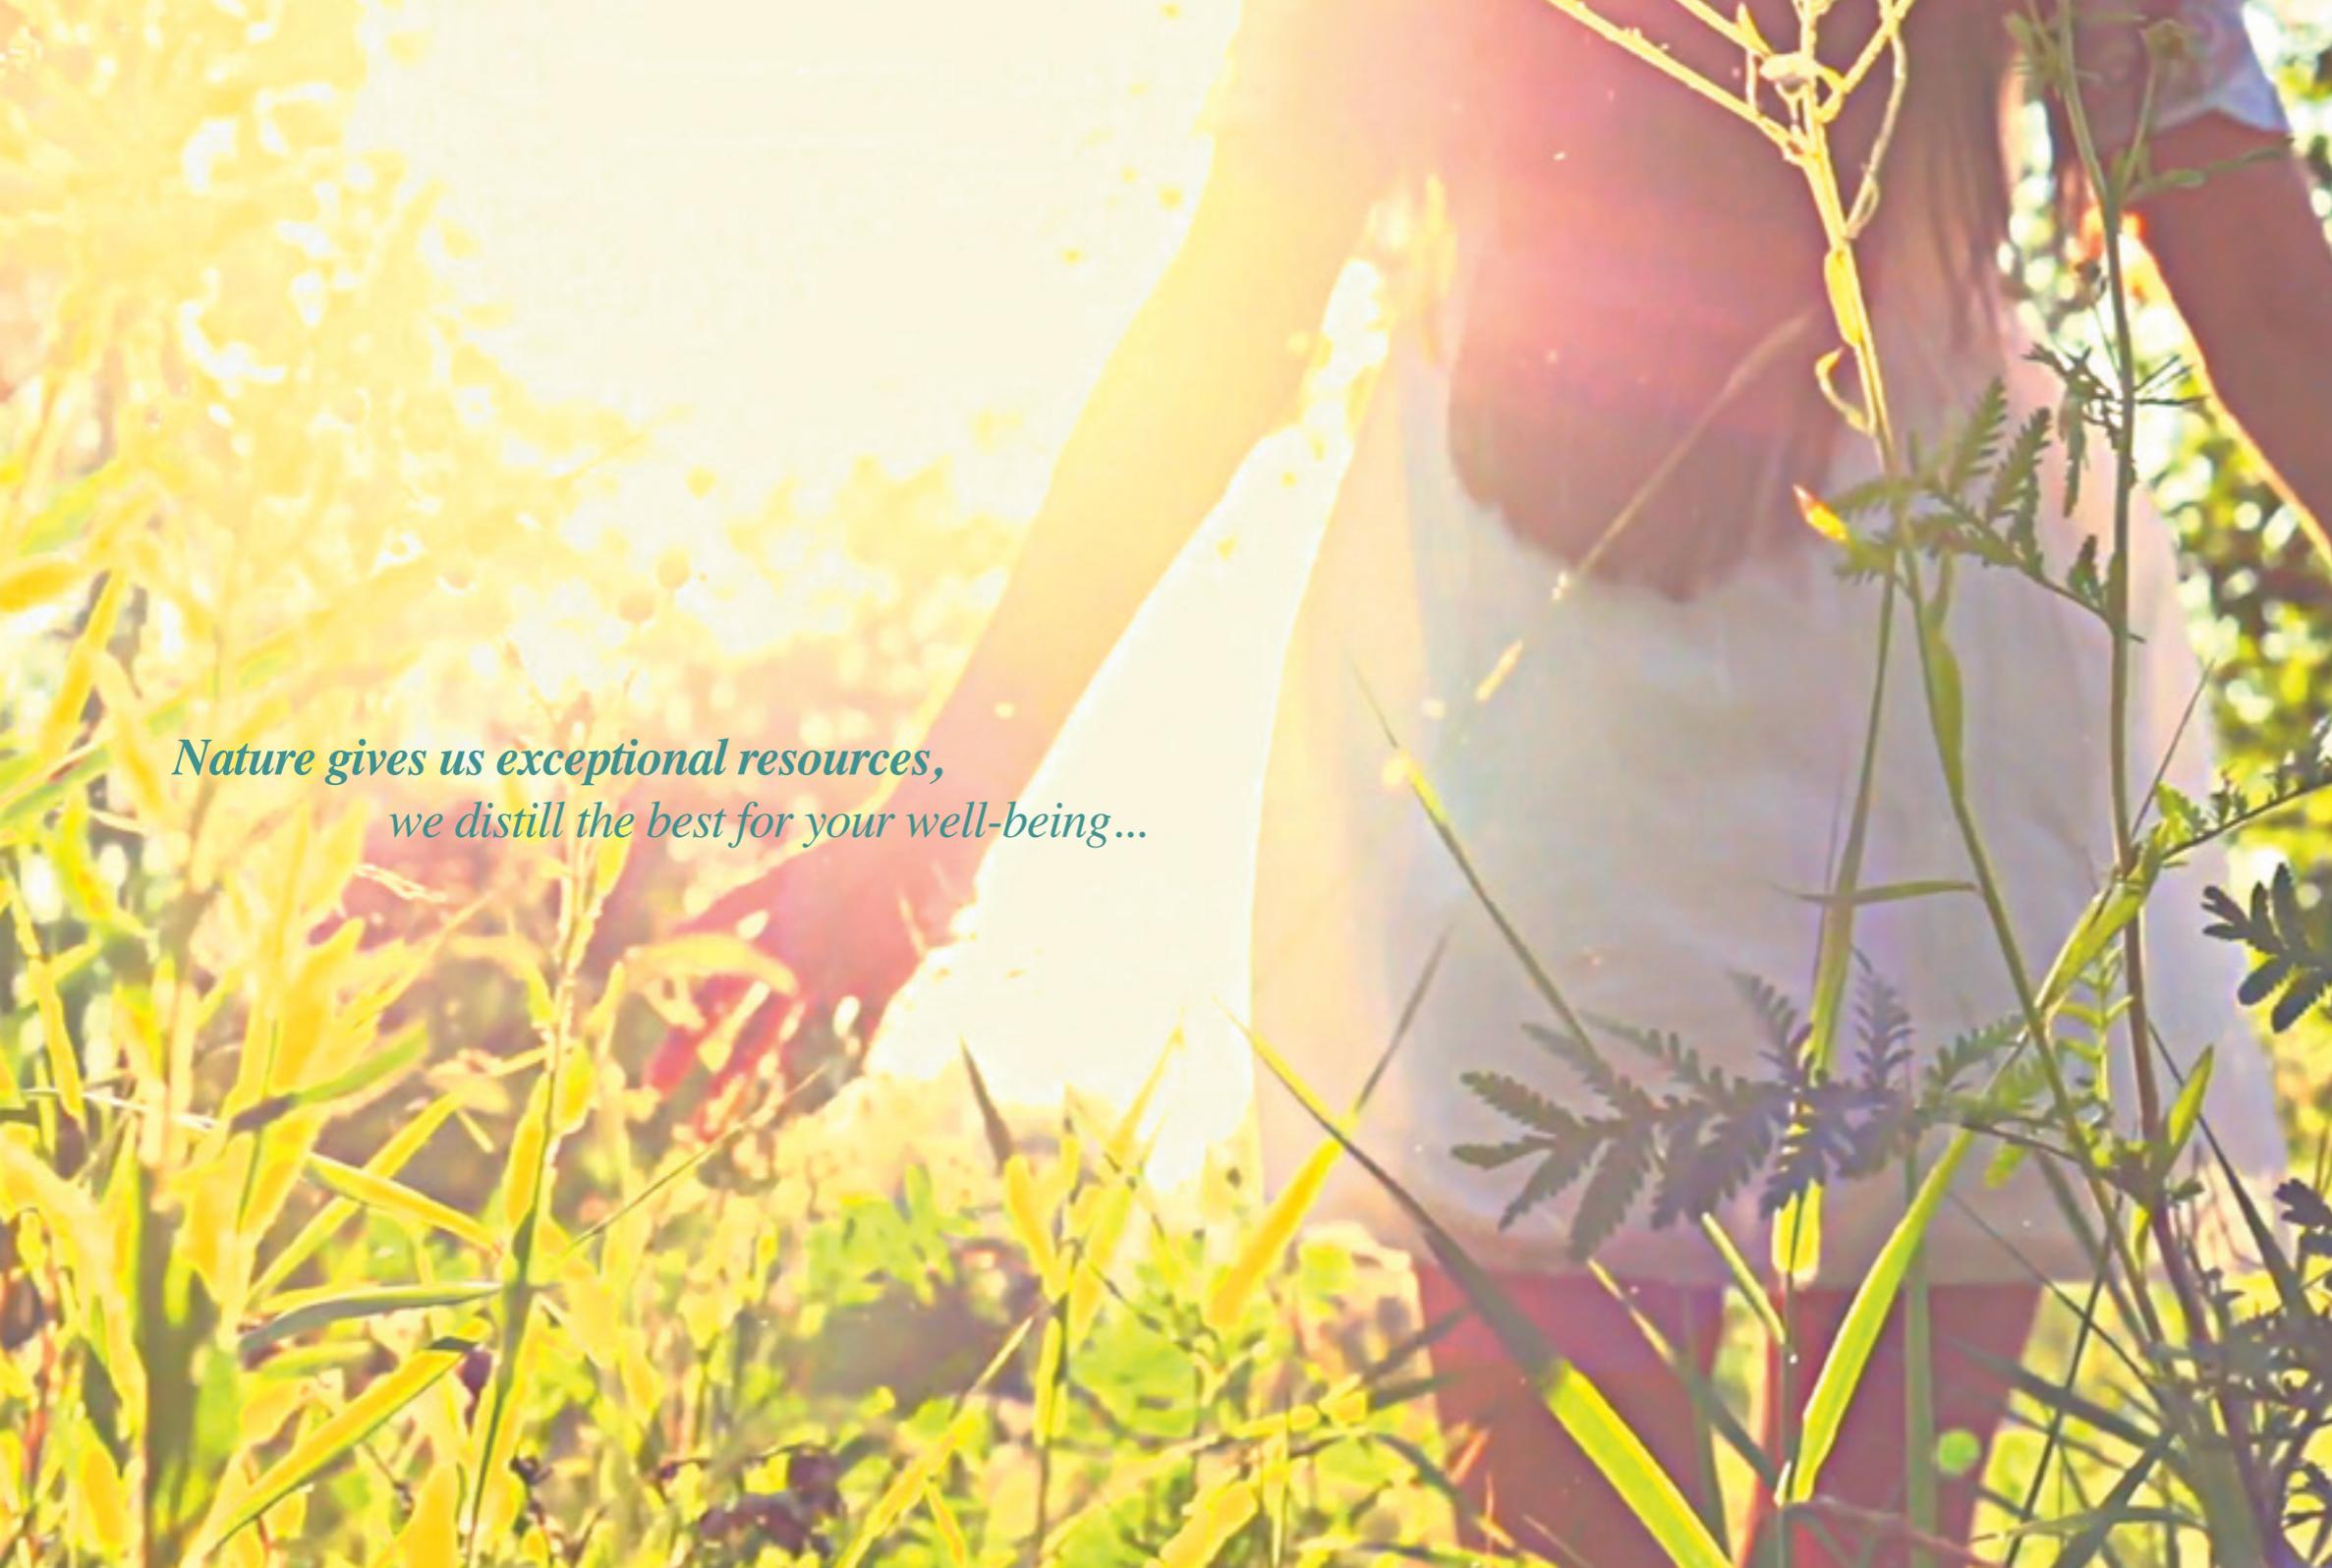

raw materials. The new general manager brings fresh dynamism to the company by creating a brand called Camylle. The name given to his daughter inspired him to name the brand Camylle, a name that perfectly describes sweetness, rest, nature and cleanliness... A way to build enterprise value.

### New product lines were developed

Voile de Sauna, Brume de Hammam, Lait de Balnéo, Velours de Spa, Nuage, Pur Massage. These product lines were expanded and new wonderful odors and flavors were discovered. In 2010, the company changed its name to Camylle laboratories. The company moved to larger premises based in the industrial area of Sarreguemines and bigger investments in modern production technology were made.

Today, Camylle is recognized as a benchmark in the field of aromatherapy and stands for the olfactory identity of the best known wellness areas worldwide.

*Nature gives us exceptional resources,  
we distill the best for your well-being...*

## Technical and manufacturing

Laboratory Camylle offers high quality well-being products, inspired by the Spa spirit and developed according to the principles of aromatherapy.

We follow a strict formulation charter to guarantee the best efficiency and the constancy in the quality of our products.

To master completely this quality, all our ranges are produced in our laboratory of Sarreguemines in France. We insure the formulation, the stability tests, the manufacturing, the marking, the labeling and the conditioning there.

Our laboratory is equipped in particular with a vacuum emulsifying machine from last generation which allows us to realize in the best conditions the formulations even the most complex.

Have a good command to the manufacturing, is also a guarantee to insure a better logistics to deliver in due course a quality product. It is an essential element in our approach towards the satisfaction of our customers.

## Based on essential oils 100 % pure and natural

Essential oil has been referred to as the quintessence of the plants remedial quality. The essential oil obtained is extracted using a steam distillation process.

Essential oils are absorbed by the skin and even faster by mucous membranes.

They exercise their effect over the whole organism by recharging the deficient organs with energy and by giving them their electrons. The revitalization of the cells batteries improves the effectiveness of the immune system.

# Brume de Hammam

For an unforgettable steam bath

## Fragrances made from essential oils for steam baths

Made from an emulsion of 100% pure and natural essential oils or natural perfumes, Brume de Hammam can be dispersed using a fragrance pump to blend with the water vapor prior to it being released into the steam room. It can be used in its pure form or diluted according to the fragrance pump settings. Brume de Hammam can also be sprayed in the steam room if it is unequipped with a fragrance pump. Brume de Hammam is the most popular product used in luxury hotel spas and thalassotherapy centers worldwide. Discover our fragrances and experience their relaxing, energizing, refreshing, soothing, slimming, revitalizing and mood enhancing qualities, among others.

## The benefits of hot steam teamed with the benefits of aromatherapy

With steam rooms, you can experience the benefits of hot steam, which opens up skin pores and helps eliminate dead cells and toxins. Immersed in an environment where temperatures reach up to 50° C at 100% humidity, your body is totally relaxed and your mind soothed. Here, your entire body can absorb the benefits of essential oils through the skin and mucosae. This experience offers you a feeling of wellness and cleanliness unlike any other. Your entire body is cleansed, and even your soul feels purified.

 Capacity : 250ml, 500ml, 1l, 5l

## Voile de Sauna

Purifying body and mind

### Fragrances based on pure and natural essential oils for sauna

Fragrances made from 100% pure and natural essential oils for saunas. 100% pure and natural essential oils are incorporated into a cosmetic alcohol solution which is then added to the sauna bucket water, enabling them to be perfectly diffused while preserving their olfactory qualities. Dilute the essential oils at 10 to 20 ml (one or two caps) per liter of water, then pour the diluted solution over the hot stones on the stove. Never use non-diluted essential oils in a sauna. As fatty substances, they will burn instantly, leaving a layer on the lava stones that produces noxious fumes. Voile de Sauna by Camylle is renowned and endorsed by the most prominent sauna brands. Discover our fragrances and experience their relaxing, energizing, refreshing, soothing, slimming, revitalizing and mood enhancing qualities, among others.

### The benefits of dry heat teamed with the benefits of aromatherapy

Upon entering the sauna, the body is hit with temperatures nearing 80° C. The cardiovascular system reacts instantly, and this artificial fever effect triggers the immune system. Pores become dilated, and toxins which have accumulated in the body are eliminated through sweat. Endorphins are secreted which promote relaxation and sleep as well as a feeling of well-being. When essential oils are poured over the scorching lava stones, the entire body is able to absorb the benefits deep into the skin and mucosae. Your mind is completely at ease and free to focus solely on the feeling of purifying your body.

## Enhancing your spa's wet area is good for business

### Observation

The wet area (including saunas, steam rooms, hydrotherapy baths, etc.) represents a spa's largest investment. Nevertheless, it is often underexploited or even neglected in the operating phase. Often times, the saunas and steam rooms are simply turned on in the morning then turned off in the evening...

### Solution

With the help of aromatherapy, these spaces can indeed become a major draw for clients. The steam room or sauna is transformed into a wellness treatment in its own right and into a central component of giving your wellness space a lift, helping to boost the number of visitors to the spa. Supported by effective communications, this active program brings real added value to the establishment and has an immediate impact on the number of visitors. Certain information must be given to clients, including the steam room's weekly or monthly aromatherapy program, the "essential oil of the day" being used and, if applicable, the times at which the sauna stones are sprayed. This enhancement of existing, underused equipment adds a shot of energy to the establishments that opt to take this step, at great satisfaction to their clients.

### For saunas

Promote the weekly, monthly or customized sauna program in all communications materials: brochures – website – room TV info display.

- Post the program information near the sauna entrance, indicating the spraying times, the fragrance used, and the benefits associated with these essential oils.
- Mornings, prepare the bucket by adding 10 to 20 ml (one to two caps) of Voile de Sauna per liter of water.
- Set the spraying schedule, ideally every 30 minutes, or place the bucket inside the sauna.
- Remember to disinfect the wood panels with the Stérylane Sauna disinfecting detergent on a daily basis.

### For steam rooms

Promote the weekly, monthly or customized steam room program in all communications materials: brochures – website – room TV info display.

- Post the program information near the steam room entrance, indicating the fragrance used and the benefits associated with these essential oils.
- Arrange to change the canister under the fragrance pump in the technical room according to the established program.
- Remember to disinfect the floors, panels and benches with the Stérylane Hammam disinfecting detergent on a daily basis.

Go from a passive situation to an active program

Keep loyal clients

Attract new clients

Support and involve staff

## Equipped with the turnkey solution, we've thought of everything

We designed and have made available information flyers for you to distribute to clients at reception, in rooms, at the wellness desk, etc.

We provide you with a customized enhancement program creation tool which you can simply fill in, print and set up at the wet area entrance, near saunas and steam rooms, at the wellness desk, in elevators, on tables during breakfast, in rooms, etc.

We are available to offer advice and personalized assistance with implementing your program.

# Velours de Spa

The pleasure of aromatherapy in the spa

## Fragrances made from 100% pure and natural essential oils for spas or Jacuzzis

By "spa", we are referring to whirlpool tubs that are left full and which contain filtered water that is heated to between 30 and 35° C. Our essential oils are solubilized to create a solution in order to be diluted perfectly in the spa water, without any impact on purification or filtration. To enjoy a spa bath with essential oils, pour two to three caps directly into the water for an average sized bath (1.5 m<sup>3</sup>) lasting about 20 to 30 minutes. Velours de Spa enhances the spa bath experience by adding a subtle fragrance along with all the benefits of plant-based essential oils. Velours de Spa by Camylle is currently regarded by spa bath manufacturers and distributors as a benchmark product.

## Discover our fragrances and experience their relaxing, energizing, refreshing, soothing qualities

The Spa is a modern version of the public baths, a place where people come to socialise, have fun and meet each other. It is also a place where you can simply talk, communicate and enjoy a vigorous water massage, let your mind wander in the deafening roar of the bubbles, or achieve a virtual state of sleep despite the surrounding turbulence. At the end of a busy day, there's nothing like a whirlpool bath to relieve the tension. The pleasure of sharing a water massage bath can be seen on people's faces. Nudity removes social barriers and the movement of the water helps people to communicate with each other. Camylle Velours de Spa enhances this very social moment, adding a subtle perfume and all the benefits of essential plant oils.

 Capacity : 250ml, 500ml, 1l, 5l

# Lait de Balnéo

And the hydrotherapy bath makes sense

## An incomparable feeling of well-being and fulfilment

Emulsion of essential oils for hydrotherapy baths, bubble baths, foot spas and massage mats. By "hydrotherapy bath", we are referring to the whirlpool tub that is emptied after each bath. Our 100% pure and natural, emulsified essential oils are perfectly diluted in bath water, allowing your entire body to soak up all the benefits. Dilute Lait de Balnéo by Camylle in the bath at approximately 10 to 20 ml (one to two caps) per 150 L of bath water. The product leaves zero residue and will not clog your tub's injection nozzles. Lait de Balnéo is renowned and endorsed by the most prominent hydrotherapy bath brands.

## A true wellness treatment slimming, revitalizing and mood enhancing

A water massage bath is a wonderfully relaxing experience combining all the pleasures of water, warmth, moist steam and air bubbles massaging and caressing your body. In every century and every culture, it has always been a supreme luxury to bathe in natural plant extracts.

In the past, though, these pleasures were enjoyed only by kings and queens.

Fortunately, things are different today, and anyone can now take a break from the frightening pace of daily life and enjoy the relaxing, reviving benefits of a massage bath enhanced with plant essences. Just let yourself be taken over by all these delightful sensations, and let the essential oil molecules take you off on a journey through the plants of the world.

# Perles de Parfum

The diffusion of perfumes by Camylle

## A revolutionary solution for diffusing natural fragrances

Thanks to highly innovative technology, small pearls are saturated in 100% natural perfumes and essential oils, with an unprecedented concentration level. These Perfume Pearls from the range Perles de parfum then slowly and consistently release the fragrances over time. Camylle engineers have updated Bysoo and Bloowy, economical and silent diffusers that are extremely effective and easy to use. Through basic ventilation, the fragrance molecules are dispersed throughout spa spaces such as treatment cabins, waiting rooms and reception.

➤ **Dry and healthy diffusion:** Only molecules from natural perfumes and essential oils are diffused, without the use of chemicals, solvents, humidity or heat, therefore making it a solution free of toxic emissions,

➤ **Convenient diffusion:** Pour the recommended amount of pearls in the diffuser, turn it on, and the fragrance is released throughout the space for weeks at a time.

## To finish with candles, burning incense, incense sticks and other such health hazards

➤ **Employee-approved diffusion:** Fragrances can be problematic for certain individuals, but this is often due to improper diffusion methods. Our diffusers maintain a perfectly balanced fragrance intensity, suitable for people,

➤ **Economical diffusion:** The Camylle diffusers are sold at a very attractive price and can be installed in any space without requiring a significant investment,

➤ **Elegant and refined design** that will allow Bysoo and Bloowy diffusers to find they place even in the most demanding environments.

until 20 m<sup>2</sup>

until 100 m<sup>2</sup>

### For diffuser Bysoo

### For diffuser Bloowy

➤ Remove the lid by keeping one hand on the base of the diffuser and pulling up on the lid with the other.

➤ For 2 pods of perfume pearls in the designated tray, spreading them out evenly.

➤ Replace the lid.

➤ Turn on the diffuser by pushing the start button  
The Bysoo diffuser has 3 operating speeds:  
Level 1: Slow diffusion, left LED light  
Level 2: Moderate diffusion, center LED light  
Level 3: Fast diffusion, right LED light  
Level 4: Off

➤ Remove the lid by pulling up with the two hands.

➤ Pour 2 or 3 pods of perfume pearls in each of the two designated trays, spreading them out evenly.

➤ Replace the lid.

➤ Turn on the diffuser by turning the two start buttons clockwise.

➤ To start set both buttons at 50% (marking line up). The setting of the diffusion should be adjusted to the environment: room volume, temperature, ventilation, humidity.

## → Choose your capacity

The range Perles de parfum is available in 150 g or 300 g jars in approximately **20 different fragrances**. Laboratoires Camylle also make it possible for clients to create their own fragrance.

## Our advice

Whenever the fragrance intensity becomes insufficient, on average after 3 to 5 days, add one or two pods of perfume pearls. The operation does not take more than a few seconds. Achieve the desired fragrance intensity for any size room by adjusting the diffusion speed or the amount of perfume pearls added to the tray.

# Nuage

The magic essential oil emulsion

**The range Nuage makes the happiness of the wellness professionals for its multiple possibilities of use**

The range Nuage can be used in humidifiers, evaporators, ultrasonic diffusers to diffuse the molecules of essential oil in the environment. The range Nuage also makes the happiness of the professionals of well-being for its multiple possibilities of use: Nuage transforms a simple bath into an unique aromatherapy experience, the product gives all its sense to the experience shower concept, the followers of sauna and steambath will appreciate a reviving crushed ice peeling enriched by essential oils... a real concept of wellbeing.

**Discover these pure and wonderful scents**

Nuage is an emulsion based on 100% pure and natural essential oils developed by Camylle.

The result is a highly concentrated milky base that is totally soluble in water and is deliciously diffused into the atmosphere, enhancing the air with the subtle perfume of essential oil molecules. Essential oils are distilled from plants and are a real quintessence that contains the whole curative power of plants. These distilled oils exercise the effects and benefits that have been recognised by all civilisations since ancient times. Camylle offers a range of twenty natural fragrances, based on subtly chosen essential oils and their recognised virtues, that will help face up to all the aggressions of modern life.

 Capacity : 250ml, 500ml, 1l, 5l

# Pur Massage

The precious massage oil 100% natural

## A creamy substance with golden hues

Pur Massage is the result of a long collaboration between Camylle laboratories and a group of expert physiotherapists. It is an association of vegetable oils of the highest quality and carefully selected essential oils. Pur Massage contains 100% natural ingredients without adding preservatives. Technically, practitioners will find a Balancing blend that results in a creamy substance with golden hues. The silky and delicate touch pulls you in a massage where prevails an impression of light and wellBalancing glide which agrees on a long-term massage. Rich in antioxidants and essential fatty acids, Pur Massage has hydrating, softening and restructuring properties.

## Perfectly suited to affusion massages

Massage is the perfect representation of well-being, where all senses are awakened. Too often the used products are not at the level of this bracket of happiness. How can someone accept a massage with oils and perfumes that have been artificially produced by the chemical industry? With Pur Massage Camylle laboratories proposes a top quality range in which grapeseed oil, sesame oil, essential oils recognized for their distressing, energizing, relaxing and slimming virtues will bring you all their benefits. Pure Massage is particularly appreciated by hydrotherapy or thalassotherapy professionals for affusion massages.

## Parfum de Spa

100% natural room fragrance  
or pillow mist

### The best of home fragrances

Camylle Laboratories have selected top perfumers to create four distinguished fragrances based on pure French tradition and made exclusively from 100% natural raw material. **So were created Le Delicat, L'Elegant, L'Instinctif and Le Sophistique.**

### Exclusive fragrances

These subtle fragrances are available in a 150ml room fragrance spray, concentrated in natural scents to release a pleasant and seductive bouquet. Free from preservatives, toxic solvents or synthetic perfumes, this home fragrance spray is 100% natural.

Parfum de Spa can be used directly by spraying, pointing the nozzle towards the ceiling. The scent lasts even longer when applied to fabrics: sofas, curtains, cushions, and blankets.

 Capacity : 150ml

## Les Galets de Camylle

The olfactory companion

### A revolutionary concept: perfumed pebble stones

This completely innovative technology is based on olfactory stones into which fragrances have been micro-encapsulated for a slow, even diffusion. Les Galets de Camylle are made from a non-toxic, food-grade polymer which poses no potential threat to the environment.

This is a whole new philosophy on fragrance. Traditionally, fragrances are rarely used for ourselves. In fact, the act of "putting perfume on" does not tie us to our own scent; and if it does, it is only in an elusive way. We use perfume only for others!

 Capacity : Boxes of 6 or 36 pebble stones

### A different philosophy

Camylle Laboratories offers different philosophy; that of a fragrance for oneself. The fragrance is carried by a discreet and elegant object that becomes your olfactory well-being companion. Camylle Laboratories have created four complementary fragrances with the help of prestigious perfumers that produce a positive effect and trigger our emotional, psychological, mental and spiritual functions.

The Galets de Camylle can be used in your car or office, placed on your bedside table, or in your purse. Camylle's refined fragrances can therefore add joy to your days. At wellness professionals, the Galets de Camylle are used in a protocol that prolong the spa experience and allow to customers of spas and institutes to take the olfactory aspect of their spa away with them.

# To each fragrance its virtue

made from 100% pure and natural essential oils

## Eucalyptus

#Respiratory, with fresh, penetrating aromas

Essential oils of eucalyptus are no doubt the most commonly used in saunas and steam baths. **The strong perfume of eucalyptus perfume gives an impression of ultimate freshness and vitality.** Particularly recommended for breathing diseases, eucalyptus clears the bronchial tubes. This plant is used in many pharmaceutical compositions for its anti-inflammatory and anti-infectious properties.

## Euca/Mint

#Refreshing with fresh stimulating aromas

**It is the best refreshing essential oil ever.** In many cultures, mint is used as a herb in food and drink, and also for its Stimulating, aphrodisiac qualities. Mint has been used down the centuries as a tonic, an aid to digestion and to help treat colds, coughs and fevers.

## Orange blossom

#De-stressing, with sweet and motivating aromas

Essential oils with aromas of orange blossoms will transport you into the world of Arabian Nights, **and you will instantly evacuate your stress.**

## Orange

#Soothing, with sweet and fruity aromas

The essential oil extracted from orange helps sleep. **The bewitching fragrances of orange are very pleasant and have a slightly hypnotic effect.** A bath in essential oils of orange in the evening, just before bed, will have a soothing, invigorating, and balancing effect.

## Lavender

#Relaxing, with fresh, soothing aromas

Once a wild plant to be found in mountains, lavender has now been domesticated. The image of lavender fields in the landscapes of Provence has become one of the symbols of this lovely French region. The species most often grown is Lavandin, or spike lavender. **The outstanding curative properties of lavender are the basis of modern aromatherapy.**

## Pine

#Invigorating, with fresh and spicy aromas

Essential oils of pine are particularly effective to treat breathing diseases. **Pine is also appreciated for its Stimulating properties;** it is a real invigorating concentration, to be recommended in cases of tiredness and loss of energy. Other properties are: it helps fight rheumatism and tiredness and acts as a depurative.

## Rosemary

#Bracing with warm burning aromas.

For thousands of years, rosemary has been considered to be a powerful remedy and a magical herb. Legend has it that, in the 16th Century, Queen Isabella of Hungary, who was old and ill, was turned young and healthy again thanks to a lotion mainly made of rosemary. **Rosemary oil has the strongest bracing effect of all the essential oils.**

## Cajuput/Lemon

#Stimulating, with fresh and fruity aromas

Cajuput has been used for its curative powers since ancient times. **Essential oil of cajuput is a powerful antiseptic and a well-known muscle Relaxing.** Lemon is the best essential oil ever for women. It is well known for its bactericidal and disinfectant powers in the event of a cold, and it boosts natural immunity. Research carried out in Japan have confirmed that the use of lemon oil in offices can reduce absenteeism by half, and increase performance.

## Luxe

#Energising with fresh and bewitching aromas

Luxe is a combination of particularly refined essential oils, i.e. cajuput, guaiacum, mint, eucalyptus, and caryophyllene. Cajuput and guaiacum essential oils are well known for their antiseptic properties. This combination will turn your sauna, steam bath or hydrotherapy bath into a really rejuvenating experience, giving you **an incomparable feeling of freshness and cleanliness.**

## Elinya

#Slimming agent with pure intense aromas

Elinya is mix of Essential Oils specially combined for their slimming virtues; Mint for its digestive properties, Orange for its action in rejuvenating tissues, Lavender for its healing properties, Rosemary for its anti-wrinkle properties, Sage for its diuretic and anti-cellulite properties, and Juniper for its draining, slimming action. **These essential oils irrigate and nourish the tissues to help the skin recover its elasticity.** Combined with the beneficial action of a Sauna, Steam Bath or hydromassage, they will visibly improve the structure of the skin.

## Asie

#Exhilarating, with acidulous and mystic aromas

**It is a wonderful mixture of mystic smells, a sensuous and obsessional perfume** with balsamic notes that express character and strength.

## Polynésie

#Regenerating, with vanilla and fruit aromas

**An ingenious bouquet contains exotic jasmine,** very pleasantly and exquisite sweet floral notes.

## Méditerranée

#Balacing, with fresh and blossom aromas

**With notes of citrus fruits and herbs, on a soft, deep and captivating ground,** which reflect the whole personality of the smell.

## Orient

#Positing, with hot and wooded aromas

With sweet and spicy notes of wood that distinguish themselves from a gently mixture of heat and softness. **They provide a breath of delicacy and virility.**

**A languid and sensual fragrance with an innate sense of sophistication and well-being.** An oriental note brings forward top notes of bergamot, cardamom, and incense, mixing with heart notes of nutmeg, geranium and cedar. Base notes of vetiver, patchouli, cistus, and labdanum create a magnificent authenticity.

**A delicious journey to the Mediterranean; citrus accents on a gentle, flowery, rose-scented note.** Floral, with top notes of orange and lemon, combined with heart notes of petitgrain and rosewood, and base notes of orange blossom and caramel.

**A subtle fragrance with mesmerizing scents against a sensual backdrop of delicate amber.** Fruity top notes of bergamot, mandarin, and Ylang-Ylang mix with fruity rose and lily of the valley heart notes, and base notes of sandalwood, vanilla, and orange blossom.

**A magnificent aromatic and refreshing bouquet that dissipates into floral curls and sweet woody base notes.** Fruity citrus top notes of grapefruit and bergamot mix with heart notes of cedar, geranium, rhubarb, and base notes of patchouli and vetiver.

# Stérylane

Hygiene and cleaning products

## A particularly sensitive environment

Solariums, saunas, steam baths and balneotherapy baths have a number of aspects in common:

- the heat, which encourages germs to develop,
- direct contact with the skin,
- an environment that encourages sweating.

Total uncompromising hygiene is needed to make sure that these moments of relaxation retain all their magic.

The Stérylane range has been developed to meet the requirements of these particularly sensitive environments.

Camylle laboratories are also at the origin of the development of the revolutionary sponge for cleaning the pool liners: Stérylane Liner.

## A perfect and rigorous hygiene for the wellness facilities

The Stérylane range has been developed to meet the requirements of these particularly sensitive environments.

The active substances in the Stérylane range have been tested against the bactericidal and fungicidal norms in force.

The whole range contains essential oils. This makes all of Stérylane products highly deodorant, something that adds a pleasant impression of freshness to the feeling of cleanliness. With Stérylane, you can be sure that your steam, sauna and hydrotherapy tub have been properly cleaned and disinfected.

Capacity : 1l, 5l

# Our commitments and our philosophy

## 100% pure and natural

Our essential oils are 100% pure and natural. They are strictly selected in order to meet demanding specifications. Physicochemical analysis is made for each batch.

## Perfumes

We prohibit the use of synthetic perfumes that have an inhalation hazard rating in our products.

## Natural materials

We prefer raw materials as natural as possible and decided to develop in the same way a form in order to favour components of herbal origin.

## No animal products

No animal products are used in the creation of our products.

## Respect for the environment

We run our business with respect for the environment and also respect the lasting development of the procedure RSE (Responsabilité Sociétale des Entreprises). For example, we set up a solar photovoltaic generator with strength of 80 kW on the roof of our headquarters.

## Fair trade and support traditional production

We promote fair trade and support traditional production branches. We favour local producers and believe in building up long term trading relationships with our suppliers.
